-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 September 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1 and 8 recite the limitation "the separating means" in lines 1-2 and line 3, respectively. There is insufficient antecedent basis for this limitation in the claims.

4. Claim 39 recites the limitation "the vegetation cell" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-7 and 9-38 are rejected as depending from a rejected claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 40- 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Northrop.

Northrop teaches a system and process for treating waste comprising the steps of separating liquid and solid waste (central clarifier of Fig. 3), treating the separated liquid

Art Unit: 1724

in a liquid waste treatment means (aerobic reactor of Fig. 3), treating separated solid waste in a solid waste treatment means (aerobic/anaerobic reactors of Fig. 3), and discharging treated solid waste to a vegetation cell (solids ecoreactor), wherein the system may include a decomposition chamber having an inlet and outlet, a separator, and solid and liquid treatment means (col. 3, lines 30-34).

Allowable Subject Matter

7. Claims 1-39 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter: While it is known in the art to provide a separator with a substantially non porous inclined surface (see, for example, US Pat No 4,085,040 to Egan), in the examiner's opinion, the prior art fails to teach or fairly suggest the separator including a curved lower edge structured in such a way that water moves around the curved lower edge while allowing solids waste to fall off the separator. The instant invention provides the advantage of allowing the majority of the liquid waste to flow along the surface of the separating means while effectively separating solids from the liquid.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References are cited of interest to show the state of the art.
